

# Allied Business Solutions

*Are you aware you are overspending  
on your telecommunication bills  
by as much as 40%?*

Telecom and related network services rank among the top 5 business expenses. 80% of telecom invoices include vendor billing errors, unnecessary services and misapplied taxes, tariffs and surcharges.

If you are like many other companies, controlling communication costs has become increasingly difficult in the face of today's economy with complex technologies, numerous choices and vendor support challenges. The majority of companies do not have the time or expertise to audit their own services.

Allied Business Solutions is a completely unbiased resource specializing in telecommunication billing solutions; our talented staff has decades of combined experience and is continually educated in the complex and ever-changing field of telecom. We have provided savings for a wide range of clients including schools, government entities, medical facilities, non-profit organizations, corporations and small businesses whose monthly telecommunication expenses range from \$ 40,000 up to \$1,000,000.

At Allied, our approach is to define your current telecom inventory by diligently examining and verifying all facets of your billing to achieve your telecom needs with the most cost effective strategy. We concentrate on identifying telecom billing errors, managing disputes and obtaining refunds for corrections (including historical credits) allowing you to stay focused where you are needed most — on your own business. The best part is the whole process takes very little of your time, there's no upfront cost and we only get paid through the savings we generate. To see how Allied Business Solutions can help your company—contact us today!

**Imagine what Allied can do for you!!**
